United Kingdom

Project: ES/09/LLP-LdV/TOI/149026

This project has been funded with support from the European Commission. This publication is the sole responsibility of its author. The Commission is not responsible for any use made of the information contained in it.

Emotional intelligence  
care in health and social assistance

## objective

Provide training in Emotional Intelligence competencies to health and social assistance workers so they can improve their competences for the development of their daily activities and, as a consequence, to improve the quality of life of health and care sector beneficiaries.

## final beneficiaries

All those groups suffering a progressive loss of their physical functionalities, and therefore needing social care in addition to the medical treatment.

It would include, for instance, people suffering degenerative illness affecting their functional abilities or elder people.
